

## H-305

# Oil Spill Containment, Protection, and Recovery Tactics (Inland Water)

### Course Content

This course focuses on practical application of existing available technology for the containment and recovery of spilled oil in inland freshwater environments, and protection of adjoining shorelines. Emphasis areas are on realistic capabilities and limitations of equipment, optimization of equipment performance using sound employment tactics, and safety considerations associated with waterside and waterborne operations.

### Target Audience/Discipline

Those individuals assigned to a HazMat Response Team, fire fighters and other local/state officials who might respond to a hazardous material incident on a large body of freshwater.

### Eligibility

Students must be Public Sector Employees or Volunteers. Eligible individuals must be employed by or serve within a political subdivision, such as a county, municipality, city, town, township, local public authority, school district, special district, intrastate district, council of governments (whether incorporated as a nonprofit corporation under state law or not), any other regional or intrastate government entity, or any agency or instrumentality of a local government. Private sector, federal, non-profit, and not-for-profit employees may not be eligible for these classes unless they also volunteer in a public sector position. Volunteers must apply through their respective public sector agencies. This program is open to Texas residents only.

### Cost

There is no cost to attend TDEM-sponsored HAZMAT training.

### Sponsored By

The Texas Division of Emergency Management.

### Funded By

U.S. Department of Transportation  
Pipeline and Hazardous Materials Safety Administration (PHMSA) grants.
